

When I click on a document, it will not open in NeoOffice, it opens in something else. How do I make it open in Neo Office?

- (1) Put your mouse over the file and right mouse click or control + mouse**
- (2) Click “Get Info”**
- (3) Click “Open With”**
- (4) In the drop down window, change it to NeoOffice.**
- (5) Close out the Info window, it should now open in NeoOffice.**
